WORK EXPERIENCE

FREELANVE CLOUD ARCHITECT & CEO

StyrVolt OÜ | Sep 2023 - Sep 2023

As the driving force behind StyrVolt, I wear multiple hats from CEO to Cloud Architect and Project Manager. Specializing in Azure, AWS, and GCP, our expertise ranges across cloud configuration and planning, to development and infrastructure. Leveraging a diverse network of seasoned freelancers we provide scalable, top-notch cloud solutions to enterprises across Europe.

CLOUD ARCHITECT & CONSULTANT MANAGER

Consid ApS | Apr 2023 - Sep 2023

Working as consultant manager and lead cloud architect at Consid Denmark. Work consists of client projects, consultant leadership and recruitment, and helping Consid engage with the danish consultant market.

HEAD OF ERP & BACKEND DEVELOPMENT

Sund & Bælt - Tolling | Oct 2020 - Apr 2023

As the development manager for ERP and backend development, I successfully led the development teams at Sund & Belt, overseeing ERP and backend development for Brobizz, the Great Belt Bridge, and select projects on the Öresund Bridge. My role encompassed a blend of management, program management, and solution architecture responsibilities.

Key responsibilities:
- Directed internal technical resources and project management teams to ensure project success.
- Oversaw program and project management.
- Designed Azure cloud architecture solutions that improved performance and efficiency.
- Overseeing and managing a team of 45 highly skilled consultants from organizations such as Netcompany and DXC.

PERSONAL PROFILE

Dedicated and accomplished Senior Architect and manager, skilled in Cloud Computing and technical project management. Expert in leading and coaching diverse teams, driving digital transformation, and delivering high-quality software products.

Leadership & Management fundamentals
Niels Brock | 2022

M.Sc. Game Software Development.
IT University Copenhagen | 2010

Bachelor in film & Media
Copenhagen University | 2008.

Data Technician
MIF Ballerup | 2002

Notable Achievements:

- Spearheaded Brobizz's Azure Cloud transformation, migrating legacy ERP systems, custom applications, websites, payment gateways, and integrations, resulting in enhanced scalability and reliability.
- Established a new development framework for developers, incorporating Azure policies, automated testing, GitHub, and Azure DevOps, which improved productivity and solution quality. Established DevOps team and mentality.
- Orchestrated seamless integrations with Nordic partners such as EasyPark and AutoPass, strengthening and expanding service offerings.
- Developed new API integrations between Brobizz, the Great Belt Bridge, and the Öresund Bridge, streamlining data exchange and collaboration.

CTO

Con-Linq | Oct 2019 - Aug 2020

As the CTO at Con-Linq, I played a pivotal role in shaping the company's technological landscape and driving its success. My responsibilities extended beyond development planning and technology selection, encompassing strategic decision-making, resource management, and talent acquisition in the IT domain.

Notable Achievements:

- Defining and executing a comprehensive development roadmap that aligned with the organization's goals and priorities, ensuring the delivery of high-quality, innovative products.
- Assessing and implementing cutting-edge technologies, including Azure DevOps and Azure VMs, to enhance operational efficiency, scalability, and product performance.
- Establishing and refining the company's IT strategy to maintain a competitive edge in the industry and adapt to ever-evolving market demands.
- Overseeing the IT and development department, including development, support, and infrastructure teams, fostering a collaborative environment that encouraged innovation and continuous improvement.
- Attracting, hiring, and retaining top IT talent, nurturing their professional growth, and building a high-performing, cohesive team capable of overcoming complex technical challenges.

ERP INTEGRATION RESPONSIBLE (FREELANCE)

COOP | Jun 2018 - Aug 2019

As a freelance consultant at COOP, I played a pivotal role in managing and optimizing the integration of COOP's systems with an extensive network of over 1000 vendors, including industry giants like Arla, Schulstad, and Danish Crown. As responsible for EDI technology, I facilitated seamless communication and data exchange between COOP and its partners, contributing significantly to the efficiency and success of their SAP ERP migration program, Coop One.

Notable achievements:

- Spearheading the coordination and optimization of EDI setup to ensure streamlined, secure, and reliable data transfer between COOP and its diverse vendor base.
- Collaborating closely with stakeholders to understand their unique requirements and challenges, enabling the development and implementation of tailored integration solutions.
- Navigating the complexities of a large-scale SAP ERP migration program, driving the Coop One initiative toward a successful and timely completion.
- Overseeing and managing a team of highly skilled consultants from organizations such as TCS and KPS, fostering a productive and collaborative environment that encouraged innovation and excellence.

My expertise in integration management, combined with my ability to coordinate large-scale projects and lead diverse teams, enabled me to deliver tangible results for COOP and its partners, enhancing operational efficiency and strengthening their position in the competitive retail landscape.

SAFE CONSULTANT (FREELANCE)
BEC | Nov 2017 - Jun 2018

In a transformative Salesforce CRM implementation project involving Nykredit, Spar Nord, BEC, and Arbejdernes Landsbank, I initially started as a SAFe Scrum Master, facilitating agile team collaboration and maximizing productivity. As I progressed into the Release Train Engineer (RTE) role, I expertly coordinated multiple Agile teams across the banks, ensuring a successful Salesforce CRM deployment.

By leveraging the Scaled Agile Framework (SAFe), I effectively managed the project's complexity and scale, ultimately empowering bank advisors with an efficient, user-friendly tool to enhance customer experiences. My experience in managing large-scale, cross-organizational Salesforce implementations demonstrates my dedication, expertise, and ability to deliver exceptional results in the dynamic CRM technology landscape.

TECHNICAL PROJECT MANAGER (FREELANCE)
NOTA | Apr 2017 - Oct 2017

As a dynamic Technical Project Manager, I expertly led two teams in the development of an engaging audiobook mobile application, encompassing both frontend and backend components. My strategic guidance and technical acumen ensured a seamless user experience and robust performance, resulting in an immersive listening experience for audiobook enthusiasts.

TECHNICAL PROJECT MANAGER (FREELANCE)
Bang & Olufsen | Jun 2016 - Nov 2016

As an adept Technical Project Manager at B&O, I skillfully directed two teams of six in the development of the cutting-edge Beovision television set and its associated services. My leadership and technical expertise contributed to a captivating viewing experience, elevating B&O's reputation for innovation and excellence in the home entertainment sector.

TECHNICAL PROJECT MANAGER & BUSINESS ANALYST (FREELANCE)
TDC Erhverv | Dec 2015 - May 2016

Helping TDC eWeb team implement Scrum and acted as Business Analyst for new projects being added to the team.

INTERIM CTO
Daman | Jul 2014 - Jun 2015

Technical manager for development of pharmaceutical applications. Team management for team of 10 including hire/fire responsibility. Responsible for all technical deliveries and architecture including Azure cloud migration.

SCRUM MASTER & SOFTWARE DEVELOPER (FREELANCE)
CSC | Dec 2013 - Jul 2014

Scrum master for 4 people frontend development team. Development of a new web portal for CPR customers.

AZURE & MOBILE SOLUTIONS TEAM LEAD

Capgemini Denmark | Feb 2011 - Dec 2013

Technical IT consulting, system design and development, as well as technical project management on mobility and Azure projects. I worked with technologies such as HTML 5, iOS, Android, Windows Phone, Windows 8 Phone, SAP SUP, SAP Afaria, Windows Azure and IBM Worklight.

Other tasks include Capgemini Denmark Mobile Solutions Community Lead, as well as bid work on projects involving mobile solutions.

Customers i worked with:
• Danske Spil
• Ørsted / Dong Energy
• Skandia Pension
• DSB
